CELL BIOLOGY

Zilli, Loredana, Roberta Schiavone, Carlo Storelli, and Sebastiano Vilella
Analysis of calcium concentration fluctuations in hepatopancreatic R cells of *Marsupenaeus japonicus* during the molting cycle 161

NEUROBIOLOGY AND BEHAVIOR

Tong, James Jiayuan
Mitochondrial delivery is essential for synaptic potentiation 169

No. 3: June 2007

RAPID COMMUNICATIONS

Hoving, H. J. T., and V. Laptikhovsky
Getting under the skin: autonomous implantation of squid spermatophores 177
Vrijenhoek, Robert C., Melissa Duhaime, and William J. Jones
Subtype variation among bacterial endosymbionts of tubeworms (Annelida: Siboglinidae) from the Gulf of California 180

ECOLOGY AND EVOLUTION

Mills, Susan W., Lauren S. Mullineaux, and Paul A. Tyler
Habitat associations in gastropod species at East Pacific Rise hydrothermal vents (9°50′N) 185
Lauzon-Guay, Jean-Sébastien, and Robert E. Scheibling
Importance of spatial population characteristics on the fertilization rates of sea urchins 195

NEUROBIOLOGY AND BEHAVIOR

Mohamed, Abir Khalil, Carolyn Burr, and A. H. Jay Burr
Unique two-photoreceptor scanning eye of the nematode *Mermis nigrescens* 206

PHYSIOLOGY AND BIOMECHANICS

Curtis, Daniel L., Erin K. Jensen, and Iain J. McGaw
Behavioral influences on the physiological responses of *Cancer gracilis*, the graceful crab, during hyposaline exposure 222
Berger, Michael S., and Richard B. Emlet
Heat-shock response of the upper intertidal barnacle *Balanus glandula*: thermal stress and acclimation .. 232
Maldonado, Elisa M., and Michael I. Latz
Shear-stress dependence of dinoflagellate bioluminescence 242

SYMBIOSIS AND PARASITOLOGY

Dunn, Simon R., Wendy S. Phillips, Douglas R. Green, and Virginia M. Weis
Knockdown of actin and caspase gene expression by RNA interference in the symbiotic anemone *Aiptasia pallida* 250

CELL BIOLOGY

Loram, Jeannette E., Neil Boonham, Peter O'Toole, Henry G. Trapido-Rosenthal, and Angela E. Douglas
Molecular quantification of symbiotic dinoflagellate algae of the genus *Symbiodinium* 259

* * *
